

Session:3 CRUD operations

1.

Create a MongoDB collection named 'restaurants' and use insertOne to add a new restaurant document with fields: name, cuisine, location, and rating.

Ans:

Create restaurants collection and insert one document

```
Db.restaurants.insertOne({
```

```
  Name: "burger hub",
```

```
  Cuisine: "fast food",
```

```
  Location: "Ahmedabad",
```

```
  Rating: 4.2})
```

```
Db.restaurant.find().pretty()
```

2.

Use insertMany to add 3 new documents to the 'movies' collection, each representing a different movie with fields: title, genre, releaseYear, and imdbRating

Ans: insert 3 documents into movies collection using insertMany

```
db.movies.insertMany([
```

```
{
```

```
  title: "Jawan",
```

```
  genre: "Action",
```

```
  releaseYear: 2023,
```

```
  imdbRating: 7.0
```

```
},
```

```
{
```

```
  title: "Animal",
```

```
  genre: "Action/Drama",
```

```
    releaseYear: 2023,  
    imdbRating: 6.2  
  },  
  {  
    title: "Pushpa 2",  
    genre: "Action/Thriller",  
    releaseYear: 2024,  
    imdbRating: 7.5  
  }  
])
```

Verify:

```
Db.movies.find().pretty()
```

3.

Write a query using find to display all products from a 'flipkart_products' collection where the price is less than 1000.

Ans:

Find products with price less than 1000

```
Db.flipkart_products.find({
```

```
  Price: { $lt: 1000}})
```

Better formatting

```
Db.flipkart_products.find({
```

```
  Price: { $lt: 1000}}).pretty()
```

4.

Update the rating of a restaurant named 'Burger Hub' in the 'restaurants' collection to 4.7 using updateOne.

Ans: update rating of “burger hub” to 4.7

```
Db.restaurants.updateOne(  
{name: “burger hub” },  
{  
  $set: {rating:4.7}}})
```

Verify:

```
Db.resaurants.find({  
  Name: “burger hub”}).pretty()
```

5.

Delete all orders from an 'orders' collection where the status is 'cancelled' using deleteMany

Ans:

```
Db.orders.deleteMany({  
  Status: “cancelled”})
```

Verify: db.orders.find.pretty()

```
>_MONGOSH
> db.restaurants.insertOne({
  name: "Burger Hub",
  cuisine: "Fast Food",
  location: "Ahmedabad",
  rating: 4.2
})
< {
  acknowledged: true,
  insertedId: ObjectId('6a2a4c649b0fc4ca3eb33aca')
}
> db.restaurants.find().pretty()
< {
  _id: ObjectId('6a2a4c649b0fc4ca3eb33aca'),
  name: 'Burger Hub',
  cuisine: 'Fast Food',
  location: 'Ahmedabad',
  rating: 4.2
}
```

>_MONGOSH

```
> db.movies.insertMany([
  {
    title: "Jawan",
    genre: "Action",
    releaseYear: 2023,
    imdbRating: 7.0
  },
  {
    title: "Animal",
    genre: "Action/Drama",
    releaseYear: 2023,
    imdbRating: 6.2
  },
  {
    title: "Pushpa 2",
    genre: "Action/Thriller",
    releaseYear: 2024,
    imdbRating: 7.5
  }
])
< {
  acknowledged: true,
  insertedIds: {
    '0': ObjectId('6a2a4c799b0fc4ca3eb33acb'),
    '1': ObjectId('6a2a4c799b0fc4ca3eb33acc'),
    '2': ObjectId('6a2a4c799b0fc4ca3eb33acd')
  }
}
```

>_MONGOSH

```
> db.flipkart_products.find({
  price: { $lt: 1000 }
})
<
> db.flipkart_products.find({
  price: { $lt: 1000 }
}).pretty()
<
> db.restaurants.updateOne(
  { name: "Burger Hub" },
  {
    $set: {
      rating: 4.7
    }
  }
)
< {
  acknowledged: true,
  insertedId: null,
  matchedCount: 1,
  modifiedCount: 1,
  upsertedCount: 0
}
```

```

> db.restaurants.find({
  name: "Burger Hub"
}).pretty()
< {
  _id: ObjectId('6a2a4c649b0fc4ca3eb33aca'),
  name: 'Burger Hub',
  cuisine: 'Fast Food',
  location: 'Ahmedabad',
  rating: 4.7
}
> db.orders.deleteMany({
  status: "cancelled"
})
< {
  acknowledged: true,
  deletedCount: 0
}
> db.orders.find().pretty()
